

RESEARCH WORK

Advanced Econometrics

2022-I

Professor: Gustavo A. García

Email: ggarci24@eafit.edu.co

Department of Economics

School of Economics and Finance

Universidad EAFIT

The idea of this exercise is to write a research work using some of the econometrics models seen during the second part of the course and one of the databases in the list. There are several datasets and papers on different topics. It is possible that a group wants to write a paper on ideas that is not on the proposed list, so that it must get approval to do this.

Some rules:

- The paper can be written in Spanish or English, I recommend the latter
- The final document should have a scientific paper structure, I mean, it should have an introduction, literature review (short), a section of data and descriptive statistics, econometric model used, results, conclusions and a section of references. You can look at the following examples on papers using spatial panel models with data for Colombia: [Royuela and García \(2015\)](#), and [Aristizábal and García \(2021\)](#)
- The final document should be present in [Rmarkdown](#) format
- In separates files should be sent the code (R or Stata) and final database (excel, shapes, dataframes, .dta...) used
- The paper should be delivered by **Friday 27th May, 9 a.m.**
- Let me know via email the topic selected and I will send you the database

List of databases

1. Cigar

Baltagi, B.H. and D. Levin (1986) “Estimating dynamic demand for cigarettes using panel data: the effects of bootlegging, taxation and advertising reconsidered”, *Review of Economics and Statistics*, 68(1), 148–155.

Baltagi, B.H., J.M. Griffin and W. Xiong (2000) “To pool or not to pool: homogeneous versus heterogeneous estimators applied to cigarette demand”, *Review of Economics and Statistics*, 82(1), 117–126.

Baltagi BH, Li D (2004). Prediction in the panel data model with spatial autocorrelation. In: Anselin L, Florax RJGM, Rey SJ (eds) *Advances in spatial econometrics: Methodology, tools, and applications*. Springer, Berlin Heidelberg New York, pp 283–295

Data: A panel of 46 U.S. states from 1963 to 1992

2. Guns

Donahue, J. and Ayres, I. (2003) “Shooting Down the ‘More Guns Less Crime’ Hypothesis”, *Stanford Law Review*, 55: 1193-1312.

Stock, J. and Watson, M (2012). *Introduction to Econometrics*, Pearson, chapter 10, Empirical exercise E10.1.

Data: A panel of 50 U.S. states plus the District of Columbia from 1977 to 1999

3. Seatbelts

Einav, L. and Cohen, A. (2003). “The Effects of Mandatory Seat Belt Laws on Driving Behavior and Traffic Fatalities”, *Review of Economics and Statistics*, 2003, 85(4): 828-843.

Stock, J. and Watson, M (2012). *Introduction to Econometrics*, Pearson, chapter 10, Empirical exercise E10.2.

Data: A panel of 50 U.S. states plus the District of Columbia from 1983 to 1997

4. Crime

Cornwell, C. and W.N. Trumbull (1994) “Estimating the economic model of crime with panel data”, *Review of Economics and Statistics*, 76(2), 360–366.

Baltagi, B. H. (2006) “Estimating an economic model of crime using panel data from North Carolina”, *Journal of Applied Econometrics*, 21(4): 543-547.

Data: A panel of U.S. counties from 1981 to 1987

5. Product

Munnell, A. (1990) “Why has productivity growth declined? Productivity and public investment”, *New England Economic Review*, 3–22.

Baltagi, B. H. and N. Pinnoi (1995) “Public capital stock and state productivity growth: further evidence”, *Empirical Economics*, 20(2): 351–359.

Data: A panel of 48 U.S. states from 1970 to 1986

6. NCOVR

Baller, R., L. Anselin, S. Messner, G. Deane and D. Hawkins (2001). “Structural covariates of US county homicide rates: incorporating spatial effects”, *Criminology* 39, 561-590.

Data: A panel data of U.S. counties for four decennial census years: 1960, 1970, 1980 and 1990.

7. Cigarette

Stock, J. and Watson, M (2012). *Introduction to Econometrics*, Pearson, chapter 12.

Data: A panel of 48 U.S. states from 1985 to 1995

8. Mafia

Acconcia, A., Corsetti, G. and Simonelli, S. (2014) “Mafia and Public Spending: Evidence on the Fiscal Multiplier Form a Quasi-experiment”, *American Economic Review*, 104(7), 2189-2209.

Data: A panel of 95 Italian provinces from 1986 to 1999

9. HousePricesUS

Holly, S., Pesaran, M.G. and Yamagata, T. (2010) “A Spatio-temporal Model of House Prices in the USA”, *Journal of Econometrics*, 158(1), 160–173.

Millo, Giovanni (2015) “Narrow Replication of 'spatio-temporal Model of House Prices in the Usa', Using R”, *Journal of Applied Econometrics*, 30(4), 703–704.

Data: A panel of 49 U.S. states from 1976 to 2003
